

Mani Choudhury

Senior Product Designer — AI Platforms & Systems

Bengaluru, India | Open to US-based roles | [linkedin.com/in/mani-sankar](https://www.linkedin.com/in/mani-sankar) | manisankar09@gmail.com | +91-8408941188

SUMMARY

Senior Product Designer with 12+ years building enterprise and platform-scale products, currently leading AI-first, agentic workflow design at Microsoft. Expert in transforming fragmented, multi-tool ecosystems into cohesive, scalable systems through strong systems thinking, durable UX patterns, and deep design-to-engineering alignment. Known for multiplying impact by enabling teams, shaping design systems, and advancing production-realistic design workflows.

EXPERIENCE

Microsoft — Senior Product Designer

March 2020 – Present

- ▶ Lead system-level design for AI-powered, agentic experiences across Sales, Customer Success, and Delivery — shaping how Copilot and agents integrate into real enterprise workflows.
- ▶ Designed and shipped Contextual AI (CAI) experiences that improved seller focus, decision-making, and adoption by restructuring fragmented journeys into cohesive systems.
- ▶ Defined trust and explainability patterns for AI UX (cards, disclosure, reasoning, action affordances), enabling confident action on AI-generated recommendations.
- ▶ Core steward of the CXP Design System — consolidated fragmented libraries into a single source of truth, establishing reusable components, behavior standards, and governance.
- ▶ Raised design-to-engineering fidelity via implementation-ready artifacts (component specs, adaptive card schemas, interaction contracts), reducing ambiguity and rework.
- ▶ Drove org-wide adoption of VS Code-first 'vibe coding' workflows, enabling designers to prototype closer to production and shorten iteration loops.
- ▶ Partnered with PM, Engineering, and Data Science to align UX with telemetry, accessibility (WCAG 2.2 AA), and long-term platform health.

Publicis Sapient — Senior Information Designer

July 2018 – March 2020

- ▶ Owned end-to-end UX for Barnes & Noble and Bartleby (large-scale consumer & B2B platforms), translating ambiguity into scalable architectures and interaction models.
- ▶ Led design of the Activity Tracker App — from ideation and wireframes through usability testing and refinement for internal employee engagement.

Microsoft IDC, Hyderabad — UI/UX Designer (Intern)

May 2017 – July 2017

- ▶ Simplified complex, data-dense workflows in Azure Network Performance Monitor for enterprise network engineers.

Acellere Software Pvt. Ltd., Pune — UI/UX Designer (Team Lead)

April 2016 – June 2016

- ▶ Led client-facing design engagements for Trnear (fitness app) and Gamma (project analytics tool) — owned research, personas, workflow definition, prototyping, and team mentoring.

Persistent Systems (Studioworks 360), Pune — UI/UX & Graphic Designer

May 2015 – March 2016

- ▶ Delivered UI/UX from concept to launch across enterprise products including Salesforce Financial Cloud, collaborating with creative, engineering, and accounts teams.

Tech Mahindra, Pune — Associate Technical Support

January 2013 – April 2014

EDUCATION

M.Des, Design — Indian Institute of Technology, Guwahati (SPI: 9.20) 2018

B.Tech — R.T.M. Nagpur University 2012

SKILLS & TOOLS

Design Systems · AI/Agentic UX · Systems Thinking · Interaction Design · Usability Research · Information Architecture · Prototyping (Lo-Hi Fidelity) · WCAG 2.2 AA Accessibility · Sketch · Figma · Adobe CC · Invision · VS Code / Vibe Coding · Adaptive Card Schemas

RECOGNITION & PUBLICATIONS

- ▶ Microsoft Hackathon '20 — Winner
- ▶ OzCHI Student Design Challenge 2017 — First Place (out of 51 global teams), Brisbane, Australia
- ▶ Mechaton 2017 — Special Mention, SCE, Israel (robot measuring patient motivation)
- ▶ Publication: 'Tuto: A Multimedia Storytelling Toy for Preserving Social Narratives among Children and Parents' — ACE 2019, Tokyo
- ▶ Publication: 'Sproutshout: Participatory Platform for Shared Foster Care of Plants' — ACM, Nov 2017
